

INDEPENDENT ASTM-ACCREDITED LABORATORY TESTING RESULTS

The HealthySole® Plus is the first UVC-power shoe sanitizing device tested in independent ASTM-certified laboratories for efficacy against a wide variety of known healthcare acquired infection (HAI)-causing pathogens, as well as human coronavirus, Influenza A, and well-known foodborne pathogens like listeria and salmonella. In just 8-seconds of UVC exposure, the HealthySole Plus demonstrated significant reductions in pathogen presence in triple-replicate laboratory testing.

Mississauga, Ontario

Independent Clinical Lab Test Results

	% Pathogen Reduction	Log Reduction
Streptococcus pyogenes	99.99%	4.20 log
Enterococcus faecalis (VRE)	99.98%	3.97 log
Staphylococcus aureus (MRSA)	99.98%	3.66 log
Pseudomonas aeruginosa	99.92%	3.09 log
Escherichia coli (CRE)	99.87%	2.87 log
Listeria monocytogenes	99.84%	2.80 log
Salmonella enterica	99.82%	2.75 log
Human coronavirus 229E*	99.74%	2.53 log
Candida auris (fungi)	99.27%	2.14 log
Influenza A	97.76%	1.65 log
Clostridium difficile	85.30%	0.83 log
